

```
1  /* ===== Tracking our first Git command =====
2
3  // it will show, is it a git repository or not and
4  => git status
5
6
7  // make git repository
8  => git init
9  // check tracking now
10 => git status // red color file
11
12 //**** all file stand by stagin area for tracking
13 => git add --a // before comming
14
15 => git status // show green file
16
17
18 // *** add file and remove file from stagin area
19 => git rm --cached <fileName> // it will remove file form stagin area
20 => git add <file> // we can add file
21
22
23 // *** commit by on message
24 => git commit -m "First_Commit"
25 => git log // it will show all commit
26 */
```
