

```
1  //===== if and else statement =====
2
3  let x = 10;
4  if(x <= 10){
5
6      console.log("Have a good journey");
7  }
8
9  // ( === ) 3 = it is identity operator // strict equality
10
11 // it is not only type as well data type equality...
12 let Name = "Mehedi";
13 if(Name === "mehedi"){
14     console.log("congratulations Mehedi");
15 }
16
17 let x = 5;
18 if(x == "5")
19 {
20     console.log("YES"); // YES but not check data type..
21 }
22
23 // check data type as well..
24 let x = 5;
25 if(x === "5")
26 {
27     console.log("NO"); // NO coz data type is not same...
28 }else{
29     console.log("string is not equal to number");
30 }
```
