

```
1 /* ===== short command -> Alias =====
2
3 => git status
4
5 ***** if we want to short commant *****
6 => git config --global alias.st status
7
8 **** After that we type
9 => git st // it will work => git status
10
11 **** short unstage command
12 => git config --global alias.unstage 'restore --staged --'
13
14 => git unstage FileName.txt // it will unstage file that file
15
16 **** short for last commit ****
17
18 => git config --global alias.last 'log -p -1'
19
20 => git last // it will show last commit in
21
22
23 */
```
