

```
1 // ===== Error Handeling =====
2 // when code have error but we want to handel
3
4 try{
5     // it will exicute if will not an error
6     do_not_have_realy;
7 }catch{
8     // it show which type of error do we have inside the try block
9 }finally{
10     // finally going to exicute if error happedn
11 }
12
13 // if we don't use cathech then finally will exicute as defalut
14 /*
15     try{
16
17     }finally{
18
19     }
20 */
21
22 try{
23     wrong;
24
25 }catch(e){
26     // e show the error type...
27     console.log(e); // ReferenceError: wrong is not defined
28                     //at demo.js:24
29
30 }finally{
31     console.log("Altime"); // Altime
32 }
```
